The Bed of Old Atlantic.

The topography of the Atlantic Ocean FAIR WOMAN'S DOMINION bed is now almost as well known as if it were dry land. The charts represent it as a huge trough of varying depths, extending from pole to pole. Here and there are rocky peaks, like that of Teneriffe, or huge mountains of sand, like the Banks of Newfoundland, which reach up to or above the surface. Between Ireland and Newfoundland there is a remarkable submarine plain. This great level stretch of ocean bottom is always referred to as the "telegraph or cable plateau," because of the fact of the main submarine cables being stretched across it. This plateau is believed to be a continuation of the great water shed which, between the latitudes of forty and fifty degrees north, surrounds the earth, and divides the waters wnich flow south from those which flow toward the north .-New York Dispatch.

Still Bright and Booming.

A publication brimful of sound advice and the raciest bits of fun, original and copyrighted, from the pens of such noted humorists as Bill Nye, Opie P. Read, Danbury-News-Man, etc., is the St. Jacob's Oil Family Almanac and Book of Health and Humor, 1883. It is a free gift at the Druggists' counter. The work differs somewhat from its fromer editions, but is none the less attractive and in many of its features is the super or of former numbers. One special feature is the "Offer of One Hundred Dollars," open to all contestants, the details of which a perusal of the book will fully give. The Almanac is sent forth by The Charles A. Vogeler Company, Paltimore, Md., proprietors of some of the best known and most reliable medicinal preparations. A copy will be mailed to any address on receipt of a 2-cent stamp by the above firm.

No Safer Remedy can be had for Coughs Still Bright and Booming.

No SAFER REMEDY can be had for Coughs and Colds or any trouble of the Throat than "Brown's Bronchial Troches." Price 25 cents. Sold only in boxes.

We eat too much and take too little out-door exercise. This is the fault of our modern civ-ilization. It is claimed that Garfield Tea, a simple herb remedy, helps Nature to overcome If afflicted with sore eyes use Dr. Isaac Thompson sEye-water. Druggists sell at Ec.per bottle

### \$3 Worth of Hood's

Cured When Others Failed Salt Rheum or Psorlasis-Severe

Mr. N. J. McCoun Kingsley, Iowa.

"In 1879 I had an eruption appear on my left leg and arm. Sometimes it would ulcerate and on account of it I was unable to work a great deal of the time. I had seven doctors examine and treat me without success. Some called it psorasis, some eczema, some salt rheum and one knowing one called it prairie itch. All the doctors in the county had a trial but none did me a particle of good. I spent all my spare money trying to get relief. Finally I was persuaded to try Hood's Sarsaparilla. After using one and a half bottles I saw the benefit. I have now used the third bottle and am completely cured. I received more

### HOOD'S Sarsaparilla **CURES**

Sarsaparilla than from the hundreds of dollars paid for advice and other medicine. Any one suffering from skin trouble will surely get relief in Hood's Sarsaparilla." N. J. McCoun, Kingsley, Iowa.

We Know This to Be True "We know Mr. N. J. McCoun; saw his leg and arm before taking Hood's Sarsaparilla and know he was terribly afflicted; now he is cured." E. H. BANKS, Druggist, "D. A. OLTMANN"
J. P. GASPER, "R. B. ELLIS, Kingsley, Iowa. C. C. BARUER,

Hood's Pills are the best after-dinner Pills, as sist digestion, cure headache. Try a Box.

LOSS OF APPETITE, SICK HEADACHE, INDIGESTION. DIZZY FEELINGS, BILIOUSNESS, TORPID LIVER, DYSPEPSIA.

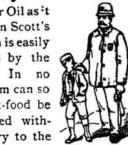

PERFECT DIGESTION will be accomplished by taking Radway's Pilla. By their ANTI-BILIOUS properties they stimulate the liver in the secretion of the bile and its discharge through the biliary ducta. These pills in doese of from two to four will quickly regulate the action of the liver and free the patient from these disorders. One or two of Eadway's Pilla taken daily by those subject to billous plans and torpidity of the liver, will keep the system regular and secure healthy digestion.

Price, 26c. per box. Sold by all druggists.

NEW YORK FASHIONS.

Gowns for House Wear. The Styles and Makes of Seasonable Garments.

to fit well around the waist, to prevent any gaps appearing. The yoke is of velvet, and reaches from the shoulders to the darts in front; while at the back it may be slightly longer. The seams of the back lining are sewn, pressed and boned, and then the yoke is well stretched upon it. The fronts are sewn and boned, and fastened by hooks

and eyes down the middle. Then the yoke is carefully pinned on to them. Great care is carefully pinned on to them. Great care must be taken that the stripes match at the shoulders, and are perfectly straight at the center of both front and back. When this is done the surah is taken and arranged ir three deep pleats from each shoulder at the back; it should be cut on the cross, and

LONG JACKET AND FASHIONABLE GOWN.

ought to be of very good quality, as otherwise it will not drape well. When draping the front a point of about eight inches long is left on each side and tied by two little knots of silk; it is afterwards fastened into the armhole, appearing to form part of the drapery. The surah should be fastened into the side seam and the armholes, but need not be brought much lower than the top of the corset, as otherwise it will give the

A TEA GOWN.

waist a clumsy appearance. The left side of the drapery must be fastened over the yoke with hooks and eyes, as this latter passes under it and fasteus on the shoulder.

passes under it and fasteus on the shoulder. The corselet can be made on the bodice, or as a separate addition. In the latter case the bodice is worn under the skirt, to which it is attached by hooks and eyes.

A very simple and pretty bed jacket is presented in the second sketch. It can be made cheaply and to look very pretty, of cream fiannel, fined with rose-colored crepon. Of course it will be more expensive and handsomer if very fine cashmere is used, and then it should be lace trimmed. The material required is one and three-quarter yards of fiannel, and it can be easily made up by the most inexperienced worker. Take a piece of material one and three-quarter yards long and 32 inches wide. Fold it in half and mark the center with a Fold it in half and mark the center with a pin. Measure eight inches on either side of the center pin and mark with two other pins. Then fold the material again and cut a slit eight inches long down the fold. Turn each of the pieces thus cut over as far as the pins, forming a turn-down collar for the neck. When this is finished, measure six inches each way from the lower corners of the cape, mark with pins, and turn the corners over, fastening with a stitch or two. Then put a button hole on each, at the places marked by pins, thus forming a cuff. Nothing now remains but to make three pleats just under the opening of the collar to form the shoulders, to put a false hem down each front, and to trim the collar and cuffs pin. Measure eight inches on either side of

colored silk. The collar is fastened by ribbons to match the color of the silk.

The long jacket seen at the left in the next engraving opens from the waist and is a pleasant change from the perpetual corselet bodice, and is, besides, far more becoming the perpetual of this commitment. let bodice, and is, besides, far more becoming to most people. The material of this costume is woolen goods in cream color, with electric blue stripes. Large mother-of-pearl or bone buttons fasten it and lend a chic appearance. The sleeves, although full, are only very slightly raised on the shoulder. The revers are of surah silk, in the same shade as the stripe, and the full rection of coffee colored surah. The same vest is of coffee-colored surah. The same style would look equally well in any color-ed striped material: for instance, two shades of green or dark blue and red, or, for a raven-haired beauty, amethyst and old gold. For half mourning, black and gray or black and red would both be effective.

A STYLISH BLOUSE. The other gown, although so simple, is very becoming and fashionable. The yoke needs a word or two of notice, for it is a neeus a word or two of notice, for it is a novelty, and any novelty in the way of yokes is welcome. The ribbon bow placed at the side of the yoke, is very pretty, and also takes away from the upright bow which terminates the band the one-sided look this new fashion in sashes is inclined to give the wearer.

look this new fashion in sashes is inclined to give the wearer.

A tea gown of red plush trimmed with cream lace and straw colored surah, is to be seen in the fourth picture. The front is formed by lace insertions divided by stripes of finely pleated surah. The collarette is also of the surah.

The little girl's dress is of cream cashmere the skirt being strewn with small pink and blue flowers. The bodice and sleeves are of the plain cream. The bretelles and flat flounces around the edges of the skirt are of

flounces around the edges of the skirt are of comflower blue velvet.

The last garment shown is a stylish and novel blouse. It is suitable for afternoon or novel blouse. It is smitable for alternoon of evening wear, and is decidedly dressy in ap-pearance, It should be made in some soft, clinging material, like bengaline, pongee, liberty silk, crepon, etc. It is shaped to the waist by an infinite number of pleats. If for afternoonwear, passementerie can be sub-stituted for the lace. The collar and the lower half of the sleeves is pleated to match the corselet. This useful and pretty blouse will be found a charming factor of a small will be lound a charming factor of a small trousseau, and also forms a convenient ad-dition to the one or two dinner dresses tak-en to wear when on a few days' visit to friends.

How Some Fires Originate.

A list of unusual and curiously caused fires has been compiled and the Railway Review mentions some of the number: It includes a factory fire which was traced to a railway truck, an over-heated axle having thrown a car from the track and set fire to a petroleum tank from which the flames spread to the building. An instance is given in which a bucket greasy waste was ignited by the friction of a belt which sagged against it. In a harmless case of spontaneous ignition of oily waste, this material, with some wood chips, had been thrown into the fire box of an idle locomotive, shortly after which the workmen were surprised by the blowing off of steam by the engine. Another fire was due to only waste in a manner which could not well be foreseen. Only heavy mineral oils were used, and a place was provided for the waste, but a cockchafer crawled from the receptacle directly to a gas jet when the creature was quickly consumed, and the oily cotton filaments adhering to its body spread the fire. Well known incendiaries are photographic and other lenses which act as burning glasses, and bright tight plates, which serve as concave mirrors. A plumber's

exploit consisted in applying the flame test to a newly made joint in a gas pipe, then covering the pipe without noticing a small blue flame, which was discovered some six weeks afterward, when the leak had become somewhat enlarged. A nail glanced from a carpenter s hammer into the conveyor of raw material in a jute factory, rubbed against the drum and produced a spark which set fire to the place. A flood burned one factory by causing a pile of iron filings to oxidize so rapidly as to become intensely A stream from the firemen's hose started a second fire in New York while putting out one in a small building, a neighboring shed containing quicklime having been penetrated by the

Pretty Hands.

Scientists claim that the shape and general formation of the hands change with civilization, and that a Nation can be placed in its proper place in the order of advance by an examination of these important organs of the human body. The relative difference in the degree of intelligence between man and the brutes is also very marked in the hands, and the lower we go down in the scale the less definite is the hand, or front paw, or leg. The monkeys and chimpanzees illustrate this point with marvelous force, for as they have been claimed to come the nearest in the brute world to human kind it would naturally follow that their hands would approach the nearest toward that of men or women. In civilized Nations those engaged in menial work have the poorest shaped hands, and are often less expressive. The hand of the woman who takes good care of the hands is a study in itself, and a thing of beauty. Color, shape and general character are all developed by training and care, until the human hand can be made the most attractive and impressive part of the body. Large hands, red hands, or diseased hands of any kind are ugly, and actual disfigurements. If the skin is naturally white it is not hard to preserve it, and this is done by cleansing them twice a day with a little soap and a little oatmeal. Warm water should be used occasionally, but not hot. They should be rubbed over carefully once a week with a slice of lemon, and if they incline to chap use camphor ice at night. Keep them covered with soft gloves, with holes cut in the middle to prevent the camphor ice from evaporating. For very red hands use equal parts of glycerine, lemon juice and rose water. Very often a tight ring, or tight sleeves, will cause red hands, and these causes should be removed at once.-Yankee Blade.

each front, and to trim the collar and cuffs with lace. This jacket may, if preferred, be lined with thin washing silk, which, when turned over, forms a very pretty collar and cuffs; but when it is made of good flannel this lining is unnecessary, though the cuffs and collar look very pretty faced with light own make. No man has ever yet been able to climb into Heaven on a ladder of his He First Voted for Madison.

It is claimed for Edward Embry that he is the oldest Democrat in the country. He was born in or near the bamlet of Summer Duck, Va., in the summer of 1788, and it is supposed that he first voted for James Madison, the fourth President of the United States. The old gentleman seems to have passed a rather quiet, uneventful life, notwithstanding his great age. He was drafted for the War of 1812, but was not called upon for actual service. His age at the breaking

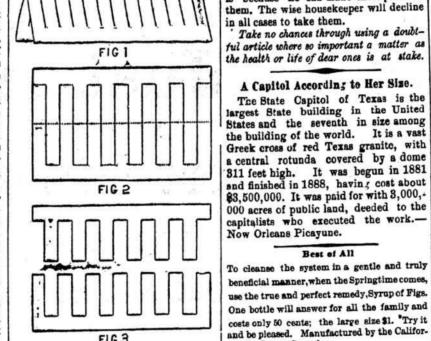

out of the Civil War, seventy-three naturally exempted him from service. Mr. Embry was married in 1824 to Miss Harriet E. Embry, and by this union had ten children, seven of whom are still living. The oldest son is now sixtyfive, and the youngest forty-five. The old veteran makes his home with his two youngest children. Besides the seven children there are sixteen grandchildren and twenty-seven great-grandchildren, and if the old gentleman ever gathers his descendants about the family nearthstone the house must be of a good size to accommodate them all. Until within a few years the family has made their own clothing, weaving the cloth on hand looms; and the counterpanes now in use in the family home are homewoven. The clothing worn by the oldgentleman as shown in the picture is homespun. During his active life he was a hard worker, eating plain food and being simple in his habits. His life has been quiet and peaceful. He has hardly been outside his native county. During all his life he never rode on a train of cars.

He is below the medium size and his hair is comparatively black, even at his advanced age. His memory of old times is still good .- Boston Globe.

How to Courtplaster a Cut.

In case of a serious cut fold a piece of courtplaster a little larger than the wound,

THE WAY TO CUT THE COURTPLASTER.

lengthwise through the middle, and cut into narrow strips from the fold to within a quarter inch or so of the two edges that lay together, as in Fig. 1. Unfold the pieces of courtplaster, clip loose the narrow strips at opposite ends, alternately, as in Fig. 2, and you will have two comb shaped pieces of courtplaster, as in Fig. 3. Now stick the straight edges of the two pieces firmly to the flesh, one on each side of the cut and a little way from it, the narrow strips (the teeth of the "combs") lying across the cut. All is now ready for closing the wound. Take a strip from each side and draw the flesh together, and stick them over on opposite sides. When all the strips are in place the wound will be evenly and safely closed--New York Press.

About 20,000 letters are addressed to the Queen of England from her subjects every year. The Queen's letters have precedence of all others, and are forwarded to Windsor by special messenger from the General Postoffice.

The Ups and Downs of Fashion.

SERIOUS FACTS A LOUT BREAD Which Housekeepers Should Enruestly

Consider. A serious danger menaces the health of the people of this country in the numerous alum baking powders that are now being urged upon the public. There is no question as to the detri-mental effect of these powders upon the

system. Every Board of Health every

physician, will tell you of the unwhole-

some qualities they add to the food.

Some countries have absolutely pro-

hibited the sale of bread containing
